2018 Small Fruit Plant Sale

Variety Information

**Blueberries:**

- **Need at least 2 varieties for cross-pollination.** Plant in full sun with good drainage. Plant 6 - 8 feet apart in a row. Plants are potted in 1-gallon containers.

  **Titan**
  - Rabbiteye type blueberry
  - Ripens June - July
  - Very large berries

  **Premier**
  - Rabbiteye type blueberry
  - Ripens in June.
  - Large berries
  - Upright growth and highly productive

  **Powder Blue**
  - Rabbiteye type blueberry
  - Ripens June - July
  - Medium-Large size, light blue berries
  - Upright growth habit
  - High yielding

**Blackberries:**

- Thornless upright (do not require trellising) plants can bear up to 7 weeks. Plants are self-fruitful and do not require cross-pollinating. Recommended plant spacing is 3-5 feet apart. Excellent cold hardiness. Mature plant size is 4-5 ft high and 3-4 ft wide. 2-year old potted plants are 12-24 inches upon arrival.

  **Ouachita**
  - Begins bearing fruit in 2 years.
  - Ripens in June.
  - Large, sweet berry.
  - Hardy, high yielding producer.
  - Very upright canes.

  **Navaho**
  - Begins bearing fruit in 2 years.
  - Ripens in June.
  - Very sweet.
  - Hardy, heavy producer

**Raspberries:**

- Plants are self-fruitful and do not require cross-pollinating. Plant 6-10 feet apart in a row. 2-year old potted plants are 12-24 inches upon arrival.

  **Nantahala**
  - New release from North Carolina State University.
  - Upright thorny variety that produces dark red berries.
  - Large berries with small seeds
  - Good late season variety, reduces sunscald and heat damage

**Muscadines:**

- 2-year old plants sold in 1-gallon containers. Plants are approximately 2-5 feet in length upon arrival.

  **Cowart**
  - Self-fertile. 17% sugar.
  - Black, medium size fruit with excellent flavor and edible skin
  - Cold hardy and disease resistant
**Grapes:**

Concord Seedless grapevine is very similar to Concord Seeded except it is seedless and has a sweeter flavor. This grapevine variety is excellent for pies, jellies, jams, juice and fresh eating. Fruit ripens 7 days earlier than Concord. Zones 5-8. Ripens in September. Self-pollinating.

**Strawberries:** Bundle of 25 bare-root plants. June-bearing.

**Jewel**
- Midseason variety.
- Large berries with superb quality and flavor.
- Performs well over a wide range of growing conditions.
- Plants have moderate winter hardiness.

**Earliglow**
- Medium size.
- Sweet flavor.
- Fruit size tends to decrease as the season progresses.
- Plants are very vigorous and runner well.
- Good disease resistance.
- Recommended for beginners.

**Asparagus:** Easy to grow. Comes in bundles of 10.

**Jersey Giant**
- Known for heavy yields and thick spears
- Large dark green spears with purple bracts
- One of the most frost hardy varieties
# Fruit Trees

*All fruit trees are shipped bare-root individually wrapped in water retaining gel to keep moist*

**Apples:** Two-year old, bare-root trees. **Need two varieties for pollination.** Plant 12-16 feet apart. Trees are 4-5 ft upon arrival.
