|--------------|--|
| Jersey Giant | <ul style="list-style-type: none"><li>• Known for heavy yields and thick spears</li><li>• Large dark green spears with purple bracts</li><li>• One of the most frost hardy varieties</li></ul> |
|--------------|--|

### **Muscadines:**

2-year old plants sold in 1-gallon containers. Plants are approximately 2-5 feet in length upon arrival.

Ison  
(black)

- 19% sugar
- Edible skin
- Ripens early season
- Fresh eating, wine, jelly, juice

Tara  
(bronze)

- Self-fertile muscadine ripens early to mid-season
- 17% sugar
- Fresh eating, wine, jelly, juice

### **Grapes:**

Concord  
(blue)

Concord seedless grapevine produces blue, medium-large size grapes that ripen in September. Self-pollinating. Good for fresh eating, jams, jellies, pies, and juice.

Thompson  
(green)

This well-known green seedless grape is one of the most popular table grapes. It is also the grape most used for raisins. The fruit is most delicious when allowed to fully ripen and turn more golden than green. Thompson produces large and well-filled clusters. Grows well in hot climates. Good for all uses. Ripens in September.

### **Strawberries:**

Bundle of 25 bare-root plants. June-bearing.

Earliglow

This variety produces fruit that has a firm, glossy skin, firm flesh, and medium size. Its sweet flavor makes the variety excellent for fresh eating and freezing. Fruit size tends to decrease as the season progresses. Earliglow plants are very vigorous and runner well. Disease resistant. Recommended for beginners.

Jewel

Jewel performs well over a wide range of growing conditions. Midseason variety, recommended for commercial growers and home gardeners. Jewel has large berries with superb quality and flavor. Plants have moderate winter hardiness.

# Fruit Trees

*All fruit trees are shipped bare-root individually wrapped in water retaining gel to keep moist*

## Apples:

Two-year old, bare-root trees. **Need two varieties for pollination.**  
Plant 12-16 feet apart. Trees are 4-5 ft upon arrival.

- |                |   |
|----------------|---|
| Pink Lady      | <ul style="list-style-type: none"><li>• Blushing pink skin over green</li><li>• Tartness balanced with a touch of crisp, sweet flavor.</li><li>• Ripens in October</li><li>• Requires pollination.</li></ul>  |
| Honeycrisp     | <ul style="list-style-type: none"><li>• Beautiful red skin over a yellow background.</li><li>• Sweet and mildly tart flavor</li><li>• Ripens late September.</li></ul>  |
| Granny Smith   | <ul style="list-style-type: none"><li>• Great pollinator</li><li>• Large fruit with bright green skin</li><li>• Apple is firm and tart.</li><li>• Ripens mid-August through mid-October</li></ul>             |
| Arkansas Black | <ul style="list-style-type: none"><li>• Excellent pollinator</li><li>• Medium size fruit with dark red skin</li><li>• Flesh is firm, white, juicy and crisp</li><li>• Ripens in October to November</li></ul> |

## Fig:

Plant 15 - 20 feet apart. Grows best in well-drained soil. Plant in full sun. Bears fruit in 3 years. Self-Fertile. Ripens late summer (July-August) Mature trees can be 15 feet high and 10 feet wide. Yield is 1-2 bushels per tree.
