Plants are self-fruitful and do not require cross-pollinating. Plant 6-10 feet apart in a row. Plant in full sun.

- | | |
|-------------|---|
| Double Gold | <ul style="list-style-type: none">• Two harvests per season. Summer and Fall• Deeply blushed, golden champagne colored fruit.• Produces large sweet berries |
|-------------|---|

Tayberry

Cross between a blackberry and red raspberry. Plant 5 feet apart. Produces in 1-2 years.

- Large fruit
- Self - pollinating
- Ripens July - August

Asparagus:

Easy to grow. Comes in bundles of 10.

Jersey Giant

- Known for heavy yields and thick spears
- Large dark green spears with purple bracts
- One of the most frost hardy varieties

Muscadines:

2-year old plants sold in 1-gallon containers. Plants are approximately 2-5 feet in length upon arrival. Plant 15-20 feet apart. Self-fertile. Bears in 2 years.

Lane
(black)

- 19% sugar
- Medium – Large size fruit
- Ripens early season
- Fresh eating, wine, jelly, juice

Magnolia
(bronze)

- Ripens mid-season
- Medium size
- 15% sugar
- Fresh eating, wine, jelly, juice

Seedless Grapes:

Plant in full sun 6-8 feet apart. Produces in 2-4 years.

Concord
(blue)

Concord seedless grapevine produces blue, medium-large size grapes that ripen in September. Self-pollinating. Good for fresh eating, jams, jellies, pies, and juice.

Red Flame
(red)

This red seedless variety produces elongated, loose and medium sized clusters. The color is a dark red. Red Flame prefers plenty of heat during ripening period. This red grape is the one most often found in grocery stores. Ripens in September. Self-pollinating.

Strawberries:

Bundle of 25 bare-root plants. June-bearing. Produces 1 year after planting.

Earliglow

This variety produces fruit that has a firm, glossy skin, firm flesh, and medium size. Its sweet flavor makes the variety excellent for fresh eating and freezing. Fruit size tends to decrease as the season progresses. Earliglow plants are very vigorous and runner well. Disease resistant. Recommended for beginners.

Honeoye

This variety combines winter hardiness, high productivity, good appearance and color, together with an excellent, firm, large-sized berry. The large berries are easy to pick and the plants produce high yields over a long fruiting season. Home gardeners will also appreciate its excellent freezing quality.

Fruit Trees

All fruit trees are shipped bare-root individually wrapped in water retaining gel to keep moist

Apples:

Two-year old, bare-root trees. **Need two varieties for pollination.**
Plant 20 feet apart. Trees are 4-5 ft upon arrival. Produces in 2-5 years.
